

Stucco Wall

Artistry in **P**laster

The Essence of Italian Elegance
with German Durability

**Crafting Elegance with
Heritage and Innovation.**

“Elevate Every Wall, Design Every Space”

Brief introduction to Stucco Wall, highlighting over two decades

of expertise in creating high-end decorative plasters and paints. Emphasize the combination of traditional Italian craftsmanship with modern technology. Founded on the principles of quality and innovation, Stucco Wall offers a range of products that embody the elegance and resilience of Italy’s artisanal heritage.

Stucco Wall delivers unmatched quality and creativity, making every project a masterpiece

Our expertise extends beyond just manufacturing; it encompasses a deep understanding of the aesthetic and functional needs of today’s architectural demands. Each product in our portfolio is crafted to not only enhance the visual appeal of structures but also to provide durable, eco-friendly solutions that stand the test of time. From the iconic Venetian plasters to cutting-edge eco plasters.

Stucco Wall ensures every product is a testament to our commitment to sustainability and excellence. Whether revitalizing historic buildings or defining new spaces,

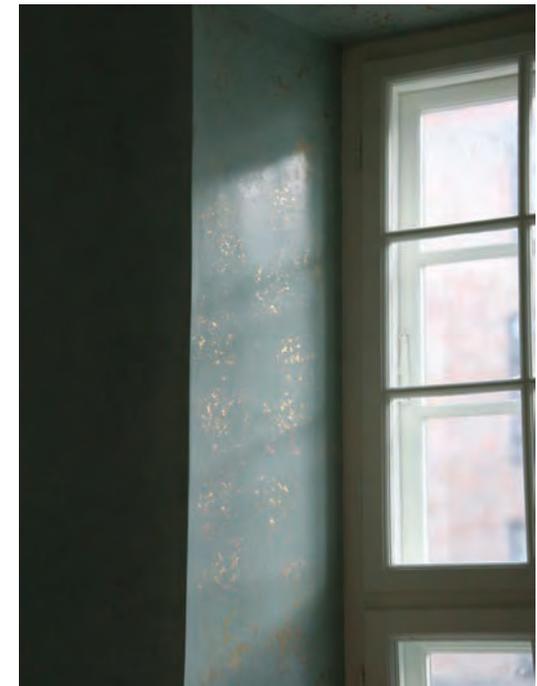

It's not ideas.
it's about making
ideas happen.

Choose from our variety of natural Italian plasters and eco-friendly stuccos, crafted solely from natural ingredients.

All of Stucco Wall's plaster products proudly carry the "Made in Italy" certification, ensuring authentic quality and craftsmanship.

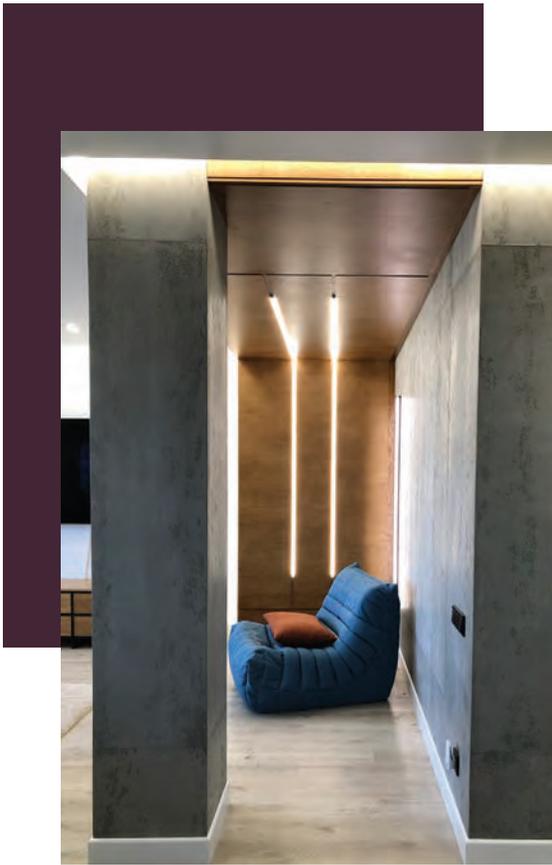

Decorative Plasters

Our Products

At Stucco Wall, we blend the rich heritage of Italian craftsmanship with the innovation of modern technology to create superior decorative plasters and paints.

With over two decades of experience, we have established ourselves as leaders in providing high-quality surface finishes that redefine the aesthetics of both interior and exterior spaces.

Company Values

Design thinker

For over two decades, Stucco Wall has been a beacon of design innovation, delivering unique surface finishing solutions that marry simplicity with unparalleled quality. Our European origins have endowed us with a rich expertise and experience, enabling us to provide world-class solutions on a global scale. At Stucco Wall, we recognize that contemporary construction demands aesthetics as much as it demands integrity, durability, and ease of use.

Why **Stucco Wall** for Construction Firms and Investors?

Innovative Solutions: In an ever-evolving world of design and technology, we proudly stand at the cutting edge. We invest continuously in research and development to ensure our products remain innovative and state-of-the-art.

Durability: Our decades-long presence in the market is a testament to the enduring quality of our products. Construction companies can rely on our finishes to stand the test of time.

Integrity: We don't just offer products; we offer our commitment to honesty, built on twenty years of success and customer trust in the European market.

Built for the Future

We are keen to partner with construction companies and investors who recognize the value of our advanced solutions and are eager to elevate their projects.

By choosing Stucco Wall, they invest not just in aesthetics but in innovative and lasting solutions.

Vision & Mission

Our products stand apart in an industry where efficiency and ease of application are Crucial:

Rapid Onboarding: The intuitive design of our products ensures new team members can quickly master application techniques, keeping your project timelines on track.

Consistency is Key: Opting for Stucco Wall means choosing consistency in finish, texture, and application—translating to fewer errors, less rework, and significant cost savings.

Efficiency in Application: With a processing time of just 30-45 minutes at room temperature, we surpass many competitors, benefiting not only the bottom line but also ensuring projects are completed on schedule, preserving your reputation and integrity.

Eco-Conscious and Health-Focused Innovations

Over the past decade, Stucco Wall has also emphasized sustainability. Our Green Line, featuring products like Marmorino Medium, Tadelakt, and Pastellone, replaces synthetic components with natural ingredients such as casein and shellac.

These eco-friendly alternatives demonstrate our commitment to the health of both **people** and the **planet**.

Operational Excellence

Stucco Wall is more than just another option in the market; it is a strategic choice for businesses that prioritize efficiency, consistency, and quality. With us, you're not just building structures; you're constructing a legacy of excellence. Join us in shaping a future where beauty and functionality converge seamlessly.

Designed for the Professional

At Stucco Wall, we prioritize simplicity of application and material versatility, empowering artisans to unleash their creativity with new and special effects. Our extensive range of additives enhances the flexibility and potential of each application.

An Artisanal Product

Stucco Wall proudly upholds the artisanal traditions that are a hallmark of our brand. We source all raw materials from Italy, and we are distinguished as the only company in the industry that still produces its own lime according to time-honored methods.

Marocco soul

This stunning hammam was created from a single piece of Tadelakt Marrakesh, without tiles, joints, or interruptions. Even the furniture and washbasins are crafted seamlessly from the same material, showcasing the endless possibilities of Stucco Wall solutions. It combines the elegance of marble with the strength of stone and withstands extreme moisture, humidity, and heat. Perfect for luxurious, curved spaces, this material offers a unique finish that transforms any room into an exquisite, unified masterpiece.

MARROKO SOUL

Smooth and glossy traditional Moroccan wall finish

Stone / Marble Effect

This lime-based plaster originates in Marocco, where it is traditionally used in hammams (steam baths) and riads. It is appreciated for its durability and satin, authentic appearance.

Stars

Plaster with Mother of pearl

Coarse plaster with flakes of silver micas

Stars glitter effect or with Mother of pearl flakes

Often beauty originates from simplicity, combined with a precious detail. The same happens for this finish: a simple plaster that becomes wonderful when enriched with flakes of natural silver mica.

PASTELLONE

Natural Marmoretto for walls and floors

Painting Plaster Flor Facade

Our Creative Projects

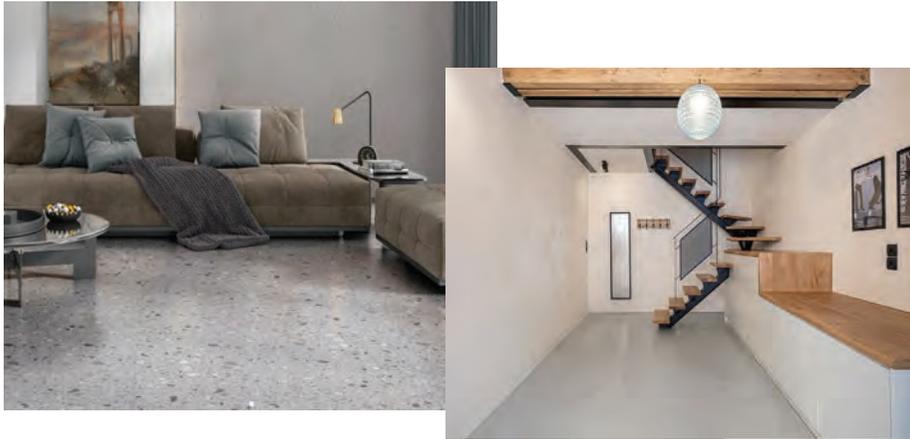

VENETIAN FACADE

A stronger Marmoretto for durable exterior walls
Facade interior & Exterior

Venetian plasters for everthing

About the Plaster from Stucco Wall

At Stucco Wall, we offer a range of innovative flooring solutions suitable for both interior and exterior applications. Our products are ideal for balconies, terraces, and other areas where humidity can rise through the screed when isolated correctly.

All our floor finishes are seamless, eliminating the need for interruptions typically required by the screed on large surfaces.

Our floor coverings are versatile and can be applied to any surface, including screed, smooth concrete, ceramic tiles, and marble. These

Our Flooring Finishes

We provide three main types of finishes, each with multiple effect options:

Suitability: Ideal for private homes, but not recommended for high-traffic public places.

Reinforced Pastellone Magnesium-Based Finishes

Pastellone is a cement and acrylic binder-based finish that resembles Marmorino but is more aesthetically pleasing. Unlike microcement, which contains quartz, Pastellone uses marble dust and grit, giving it a more refined appearance. It is 1.5 to 2 mm thick and available in any color.

It is applied in three coats. The first coat must be dry before applying the second, and the third is applied wet on wet. The top coat can be finished with oil and wax or polyurethane varnish.

Suitability: Ideal for private homes, but not recommended for high-traffic public places.

Reinforced Pastellone

Similar to Pastellone but uses epoxy resin instead of acrylic resin, providing greater resistance to abrasion and compression. It also offers excellent water repellency, requiring only a coat of water-repellent and wax for an excellent final treatment.

Suitable for all environments, including high-traffic areas. It requires a solid, non-friable substrate like tiles or a new screed.

Magnesium-Based Finishes

This category includes Terrazzo (Venetian Terrazzo) and Eco-Seminato (Sowned). These 100% organic, ecological materials are harder than concrete and marble and can be polished to a marble-like finish.

Applied in a single coat. Magnesite flooring is used in hangars for military tanks due to its resistance to metal tracks. Venetian Terrazzo can be created with a thickness of only 8 mm, and Eco-Seminato can be done with grains of 2 or 3 mm.

Ideal for creating stunning floors with marble, glass, or mother of pearl aggregates. Suitable for high-traffic areas and provides a natural, eco-friendly alternative to traditional materials.

Premium Eco-Friendly
Solutions for Bathrooms
and Wet Areas

Eco-Friendly Plaster Solutions for Showers and Hammams

Our 100% biologically safe plaster combines exceptional water resistance and strong adhesion, making it ideal for high-humidity areas like shower trays, Turkish baths, and Moroccan hammams. The Marroko Soul plaster is a perfected, lime-based stucco that adheres flawlessly to both plaster and plasterboard. All products are versatile, available in a wide range of customizable colors, and completely non-toxic, ensuring the health and safety of every project. Stucco Wall is your partner in sustainable, luxurious surface design.

Plaster for Shower

A waterproof and strongly adhesive putty, perfect for critical points like shower trays and drains. It resembles Pastellone and Marroko soul and is ideal for high-humidity areas like Turkish baths or Moroccan Hammams.

Applied like Marmorino, with a recommended final treatment of polyurethane varnish. The material is in powder form and mixed with water before use.

Marroko Soul

A perfected version of the traditional Moroccan lime-based stucco, used in hammams and external walls. It includes an acrylic resin-based binder, allowing it to adhere well to plaster and plasterboard.

Applied in three layers, similar to Marmorino, and mixed with water before use. The final treatment can be done with soap or a specialized shower plaster for better water resistance.

Colour System

All products can be colored in virtually any shade. We provide dye paste toners to be mixed with our materials at the time of use. Colors are selected using **NCS or RAL** color books. Toner prices vary based on color intensity,

Note: Some vibrant colors are not recommended for exterior applications.

QUESTIONS?

Are Stucco Wall's decorative paints easy to apply?

Yes, our decorative paints are designed for easy application. We ensure that both professionals and DIY enthusiasts can achieve excellent results with minimal effort.

Can I apply these decorative paints on exteriors?

Absolutely! Our decorative paints are versatile and durable enough for both interior and exterior applications, ensuring longevity and resistance to various weather conditions.

Can I apply whitewash lime paint on exteriors?

Yes, our whitewash lime paint is suitable for exterior use. It is specifically formulated to withstand external environmental factors while maintaining its aesthetic appeal.

Are the acrylic decorative paints washable?

Yes, our acrylic decorative paints are washable, making them ideal for areas that require regular cleaning. They offer a durable finish that can easily be cleaned with mild soap and water.

Is whitewash lime paint washable?

Whitewash lime paint has a certain level of washability. However, it is more porous than acrylic paints, so for areas requiring frequent washing, sealing the paint may be recommended to enhance its washability.

What's the difference between whitewash lime paint and modern paints?

Whitewash lime paint is made from natural lime and provides a breathable, eco-friendly option with unique aesthetic qualities such as a matte finish and depth of color. Modern paints, such as acrylics, offer a broader range of colors and finishes, greater ease of application, and typically have higher durability and washability. Whitewash lime paint is best for creating traditional or historical aesthetics and contributes to healthier indoor air quality by **absorbing carbon dioxide**.

LUSTRA MARBLE

Very glossy Marmorino polished plaster

Mirrored effect

Lustra Marble is our extra-fine Marmoretto. It contains very small marble powders, thus resulting in extremely shiny finishes. Unlike other Venetian plasters, its surface is uniformly glossy, making it ideal for creating mirror-like walls.

INTERIOR USE

100% NATURAL VERSION

MARMORETTO FINE

Glossy, fine-grain Venetian plaster with remarkable trowel movement and depth

Marble effect

Marmoretto Fine is a timeless finish that has been widely utilised in Venetian interiors for centuries. The finish has a smooth and polished surface that can be burnished to varying degrees of gloss.

INTERIOR USE
Interior use

GREEN
100% NATURAL VERSION

Lustra Marble DESCRIPTION

Lustra Marble Venetian Plaster is a lime-based Marmorino containing very small marble powders (their grain size is only 50 microns). This allows you to achieve extremely shiny finishes. Unlike other Venetian plasters, its surface has no alternation of matt and polished areas, but is, on the contrary, uniformly glossy. Thus, Lustra Marble is the ideal material to create mirror Venetian plaster walls.

Due to its extremely fine-grained nature, Lustra Marble possesses practically no pores, which allows for easy waterproofing. This characteristic makes Lustra Marble particularly suitable for bathroom walls, except for wet areas such as shower walls, where it may be prone to mould. Due to its fine texture, Lustra Marble requires thin coats, resulting in low consumption per square meter and higher yield than other Marmoretto.

Marmoretto fine DESCRIPTION

Marmoretto Fine is a timeless finish that has been widely utilised in Venetian palaces' interiors for centuries. The finish boasts a smooth and polished surface that can be burnished to achieve varying degrees of gloss and trowel movement. During the polishing phase, the trowel strokes create a chiaroscuro effect that can range from subtle to dramatic, adding a sense of depth and dimension to the surface.

Marmoretto Fine is crafted from natural slaked lime and ground marbles (grain-size 60 micron). The traditional recipe has been adapted to cater to the needs of modern homes and buildings, ensuring its durability while maintaining the unique aesthetic qualities of the original material.

MARMORETTO MEDIUM

The modern glossy Venetian plaster

Marble / stone effect

Marmoretto is a timeless finish that has been used in Venetian palaces for centuries. This medium-grained version has a smooth surface with moderate gloss and delicate contrasts. It can be used both on interior and exterior walls, as well as in wet areas such as showers and saunas.

MARMORETTO METALLIC

Classic Venetian Stucco enriched with metallic powders

Metallic & shiny effect

The metallic effect in this variation of Marmorino Fine is created by adding pearlescent mica metallic powders, resulting in a soft and iridescent finish.

INTERIOR USE

Interior use

GREEN

100% NATURAL VERSION

Marmoretto Medium DESCRIPTION

Marmoretto Medium is a classic finish that has been used for centuries on the interiors and exteriors of Venetian palaces. Its smooth, polished surface can be burnished to create varying levels of gloss and trowel movement, though it is less glossy and has a more subtle chiaroscuro effect compared to Marmoretto Fine, while still providing the sense of depth and dimension that is characteristic of all Marmorino finishes.

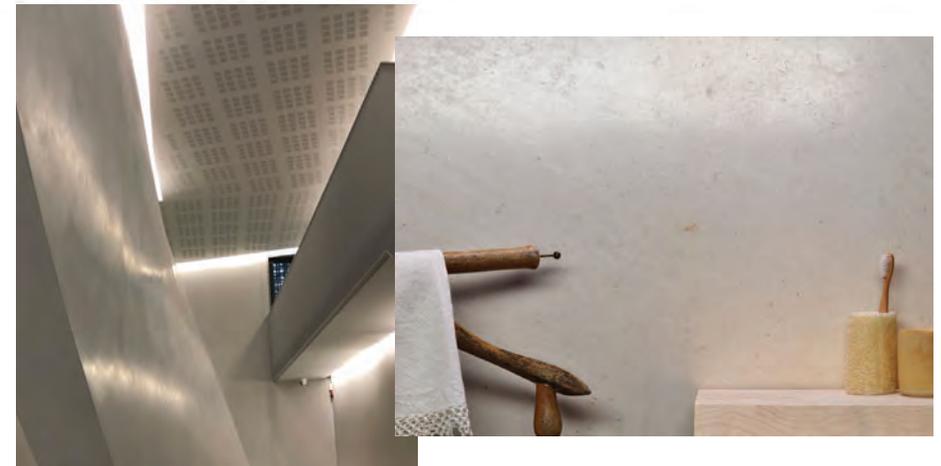

This Marmoretto finish is ideal for both indoor and outdoor walls, and can even be used on shower and sauna walls (with the necessary protective treatment applied in the latter case).

Marmoretto Metallic DESCRIPTION

This variation of Marmoretto Fine boasts a metallic effect achieved by using fine varicolored metallic powders. The finish has a soft and changing appearance, as the light refracts against the surface and creates different reflections.

Natural, lime-based material for decorative finishes on interior wall surfaces. Naturally anti-mould and breathable. This fine-grained Venetian plaster is enriched with mica powders that yield metallic reflections on the final finish. It is glossy, rich in trowel movements, and gentle chiaroscuro that convey a pleasant sense of depth.

MARMORETTO VELVET

A modern opaque Marmoretto Veneziano

Velvet fine effect

This opaque Venetian plaster is produced exclusively by Stucco Italiano. It is one of the most elegant lime-based decorative finishes rendering a variety of aesthetic possibilities. Its slightly rough and matt finish is velvety to the touch with the typical chiaroscuro appearance of fine suede.

INTERIOR USE

Interior use

GREEN

100% NATURAL VERSION

Marmoretto Velvet DESCRIPTION

Stucco Italiano's opaque Venetian plaster is a truly unique and sophisticated decorative finish that offers unmatched elegance and versatility. Made with high-quality, lime-based materials, this finish is not only durable, but also provides a wide range of aesthetic options for your decorating needs. The slightly rough and matt surface is velvety to the touch, making it a popular choice for those seeking a premium and refined appearance in their interior spaces. The chiaroscuro effect, reminiscent of fine suede, adds a touch of depth and character, making this finish ideal for use in high-end residential or commercial projects. Overall, Stucco Wall's exclusive opaque Venetian plaster is a luxurious, versatile, and high-performing decorative option.

The development of this plaster was originally motivated by a specific requirement: to create a durable and flexible coating for the interiors of a yacht. Given the inherent movement and expansion of the wooden planks composing the sea vessel, it was crucial to find a solution that would allow for flexibility without cracking. To achieve this, we added a specific quantity of fibrous fibres, which served to increase the product's flexibility and durability. This innovative approach has resulted in a plaster that is both elastic and resistant to cracking, making it ideal for use in environments subject to movement and fluctuation. Whether on a yacht or in other similarly demanding settings, this plaster offers a reliable, long-lasting solution for those seeking a flexible, durable, and crack-resistant coating.

PASTELLONE

Natural Marmoretto for walls and floors

Painting Plaster Flor Facade

This hydraulic lime and cement-based plaster adapts to a wide variety of uses and aesthetic needs: whether applied to interior or exterior walls, shower walls, table tops or interior flooring, Pastellone marries elegance with strength and durability.

Pastellone DESCRIPTION

Our Pastellone is based on the traditional "Pastellone Veneziano" recipe. This antique application of Venetian Plaster to floors can be found throughout Venice and the Veneto Region. Our Pastellone combines this antique tradition with modern materials and techniques to achieve a balance of aesthetics and durability.

Pastellone has a smooth, lightly polished finish that can vary based on the application technique and protective treatment. This seamless finish is ideal for minimalist spaces and areas where natural materials and simple lines are desired. It can be used in a variety of flooring areas, including bathrooms, kitchens, stairs, hallways, bedrooms, and even shower walls and saunas. It can also be applied to worktops, furniture, and walls for a wall-to-floor finish.

TERRAZZO

A New Era for Terrazzo Floors

With marble or mother of pearl or granite peaces

Terrazzo is a completely natural material that aligns perfectly with green building principles, featuring zero VOC emissions. This innovative plaster allows for the creation of Venetian Terrazzo floors with minimal thickness (starting at just 5 mm), eliminating the need to remove existing flooring. Unlike cement binders, Terrazzo does not shrink or crack, and it significantly reduces installation time. Additionally, its natural composition and appearance set it apart from synthetic alternatives like epoxy, ensuring an authentic finish that is easy to maintain.

INTERIOR USE

Interior use

GREEN

100% NATURAL VERSION

Key Features:

Eco-Friendly: Compliant with green building standards, featuring zero VOC emissions.

Low Thickness Application: Can be applied with a minimal thickness of 5 mm, preserving the existing floor structure.

Durability: Non-shrinking and non-cracking, ensuring a long-lasting and stable finish.

Efficient Installation: Reduces installation times, making the process quicker and more efficient.

Natural Appearance: Offers an authentic and natural look, unlike synthetic epoxy.

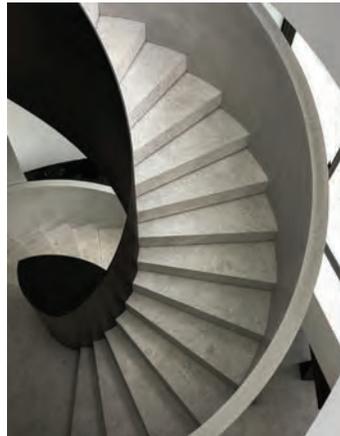

Easy Maintenance: Tools can be cleaned easily without producing polluting sludge.

Versatile Use: Can be mixed with wet aggregates for varied finishes.

Health Benefits: Antibacterial and antistatic properties contribute to a healthier indoor environment.

Fire Safety: Fire-retardant properties provide additional safety.

Superior Hardness: Achieves hardness levels six times greater than cement-based Terrazzo.

MICRO REINFORCEMENT

The maximum strength in seamless floors

Reinforced Microcement blends the durability of quartz, marble, and cement with an epoxy binder for enhanced hardness, creating a strong and elegant flooring solution. Its versatility allows for a range of decorative effects, from the look of natural stone to textured, modern aesthetic solutions.

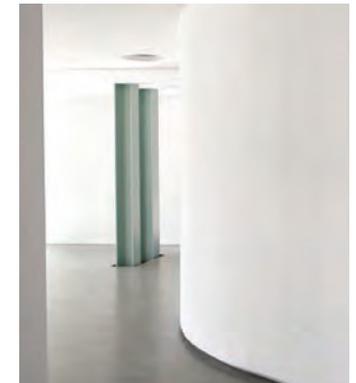

INTERIOR FLOOR

Reinforced Microcement DESCRIPTION

Reinforced Microcement is the ultimate choice for high-strength walking surfaces, making it ideal for public areas, offices, and private homes alike. Its smooth and uninterrupted continuity creates a sleek and minimalist appearance with soft light and dark shades. This versatile material offers a wide range of decorative options, from a natural stone look to a marble finish and everything in between. Enhance its beauty further with the addition of glitters, mother of pearl, mica flakes, salt & pepper sand, terracotta powder, and other additives.

Reinforced Microcement is a versatile and durable solution, made from a blend of quartz, marble, and cement, bound together with epoxy resins. Certified as safe for potable water, it can be applied to a variety of substrates. However, due to its strength, it is important to ensure the substrate is solid and stable. Application on new cement screeds or untracked tile floors is recommended for those without experience in working with epoxy binders. To get the best results, it is recommended to have Reinforced Microcement applied by a specialised artisan.

PIETRA STONE

A matt, smooth plaster that evokes the appearance of real stone

In its three versions, Pietra Stone mimics the look and feel of three classic Italian stones: Pietra di Vicenza, Pietra di Sorrento, and Pietra Serena. This plaster is perfect for coating both walls and furniture, including tables and kitchen countertops.

Who We Are

Stucco Wall is a prominent leader in high-end decorative surface solutions with a strong presence across Germany, Italy, the Balkans, and the United Arab Emirates.

Founded over 20

years ago, we have established a robust reputation for delivering premium surface finishes for a diverse range of projects across Germany, Europe, and the Balkans.

Our journey began in 2000 with the establishment of Flairline Design in Europe, specializing in sophisticated surface finishes.

As our capabilities grew, so did our project scope.

By 2012, we launched Nectech International GmbH, integrating advanced project management and ecological practices into our services, and we took on full-scale construction and renovation projects.

Today, we are expanding our presence in the Middle Eastern market, focusing on providing high-quality materials and solutions.

Our Current Role in the Middle East

While we have extensive experience as a construction partner in previous projects, our role in the Middle East is now strictly focused on acting as a supplier, consultant, designer, and training provider.

We are not entering this market to compete as a construction company.

Instead, we aim to support local developers and construction firms by offering premium materials, expert consultation, and technical training to ensure the proper use of our products.

Our goal is to create strong synergies and add value to the region's construction and design industries without directly competing as a general contractor.

Recent Projects and Expertise

Stucco Wall has successfully executed various prestigious projects across Germany, Europe, and the Balkans, working as both a supplier and full-service partner. Some of our key highlights include:

Quality is
the best
business plan
